When we started with LinkedIn Learning, we used its ready content primarily as a scaffolding to help our students build skills adjacent to our curriculum. Now, we want to personalise the experience more by weaving the Curtin voice directly into the platform. We tested this idea during our 2021 Creative Jam, collaborating with the LinkedIn Learning team to co-create customised learning paths for participants. The response was fantastic.

Curtin University
“In the areas of Design & Art, students need to develop a variety of skills, which includes software proficiency, as well as other discipline-specific hard and soft skills. As lecturers, we leverage LinkedIn Learning to put together curated playlists that augment the learning done both inside and outside of class time, allowing students to extend their knowledge base at their own pace and with great flexibility. LinkedIn Learning also enables us to create layered custom learning pathways that cater to different types of learners, whilst also giving our students an opportunity to branch into other high-quality related content that piques their interest. This constructivist, learning co-creation approach allows students to craft their own holistic learning journey, one that builds upon the conceptual foundations laid down in their units.”

-Joel Louie
Head of Digital Experience & Interaction Design, Curtin University

This widespread adoption of LinkedIn Learning within Curtin has enabled a paradigm shift in awareness — from LinkedIn Learning as a curated content library to a customised learning resource that carries Curtin’s unique voice. The partners did this in July 2021 when they co-created customised learning paths to support the university’s Creative Jam held in conjunction with NAIDOC Week 2021.

“The success of this approach is based on an important premise: that both Curtin and its students are satisfied with the quality of LinkedIn Learning’s content — relevant to their needs, delivered by credible industry professionals, and regularly updated. In fact, as the university sees a greater shift to online learning, the number of students active on LinkedIn Learning has more than doubled between 2020 and 2021.

“Our students are very discerning. If we offered them a bunch of videos cobbled together, they wouldn’t have taken to it. They use LinkedIn Learning because it’s meaningfully built. We may point them in one learning direction but there’s always more than one way to do one creative thing. LinkedIn Learning encourages them to go deeper and keep exploring. The experience is very layered and meets their needs in many ways.”

-Jonathan Pillai
Head of Animation & Game Design and Discipline Lead of Architecture & Design, Curtin University
The Curtin Creative Jam is an annual extra-curricula event at Curtin that engages students in a five-day hackathon style event to leverage Design for Positive Social Change. Every year, the organisers select a different thematic focus, and engage with different internal and industry partners for this design challenge. In 2021, the Curtin Creative Jam ran in conjunction with NAIDOC Week to bring greater awareness and a wider design-based student/staff engagement towards the theme of “Heal Country!”.

In the 2021 Creative Jam, Curtin Global students from a range of disciplines were invited to embrace First Nations’ cultural knowledge and understanding of country. Working in teams, their challenge was to design digital interactive experiences that would help to build understanding between Australian Aboriginal and Torres Strait Islander people and those of other cultural backgrounds.

To provide guidance along the way, Curtin staff worked with Creative Jam industry partners LinkedIn Learning, Adobe and Unity Technologies to deliver tailored, synchronous workshops.

“We filmed each workshop in the Creative Jam and uploaded them to LinkedIn Learning. We then layered these recordings with curated LinkedIn Learning content to create customised learning paths. This provided participants with quick access to the resources that they needed to bring their creative ideas to life,” shared Joel.

As a Creative Jam industry partner, LinkedIn Learning also ran a workshop with Amy Watson, Senior Customer Success Manager sharing insights on how students can leverage LinkedIn.com and LinkedIn Learning to position themselves for career success – from learning in-demand skills and showcasing this on their LinkedIn profile, to tapping on the power of community to grow their professional networks.

“Throughout the 2021 Curtin Creative Jam, it was clear to us that in order to turn our best intentions into real impact, we needed to inspire our students with purpose and passion, while arming them with skills and knowledge. LinkedIn Learning was fantastic in supporting this goal — students were able to realise their creative solutions within a short timeframe through our support, and by leaning into LinkedIn Learning’s skills training library.”

Matt Reed
Project Manager (Digital Projects), Humanities Faculty, Curtin University

The success of this collaboration has opened the door for deeper conversations between Curtin and LinkedIn Learning on how the university can bring more proprietary content onto the platform and create a powerful and empowering learning experience for its students.

LinkedIn Learning is a leading online learning platform that helps professionals learn relevant skills and achieve their goals. It combines a library of 16,400+ up-to-date courses in 7 different languages with an engaging, intuitive, and personalised learner experience. LinkedIn Learning also includes real-time skills insights that help learning leaders identify skills gaps. For more information, visit http://learning.linkedin.com.
